# PHILIPS TECHNICAL REVIEW

VOLUME 16

1954/1955

PHILIPS RESEARCH LABORATORIES – EINDHOVEN

52
B 1228 LIB

# CONTENTS

## VOLUME 16, 1954/1955

### LIGHT

| | Page |
|---|---|
| Electronic flash-tubes, by N. W. Robinson | 13 |
| A "Photoflux" flash-bulb with simplified cap, by R. Westra | 88 |
| Visual acuity in connection with television, by G. J. Fortuin | 172 |
| Light-beacons to aid landing aircraft, by J. B. de Boer | 273 |
| Ignition of "Photoflux" flash-bulbs with the aid of a capacitor, by J. A. de Vriend | 333 |
| The "Duplo" car headlamp bulb with an asymmetric dipped beam, by J. B. de Boer | 351 |

### TELECOMMUNICATIONS

| | Page |
|---|---|
| An experimental photoconductive camera tube for television, by L. Heijne, P. Schagen and H. Bruining | 23 |
| Secondary emission from the screen of a picture-tube, by J. de Gier, A. C. Kleisma and J. Peper | 26 |
| A radio sonde for meteorological observations, by A. Hauer and M. van Tol | 148 |
| Visual acuity in connection with television, by G. J. Fortuin | 172 |
| Inductive aerials in modern broadcast receivers, by H. Blok and J. J. Rietveld, I. Brief history and general description | 181 |
| II. Technical aspects of inductive aerials | 188 |
| The different television standards considered from the point of view of receiver design, by W. Werner | 195 |
| The theory and construction of germanium diodes, by J. C. van Vessem | 213 |
| The application of point-contact germanium diodes, by J. Jager | 225 |
| The twin-cone moving-coil loudspeaker, by J. J. Schurink | 241 |
| Feedback amplifiers for carrier telephone systems, by J. te Winkel | 287 |
| Reflection and impedance measurements by means of a long transmission line, by J. C. van den Hoogenband and J. Stolk | 309 |

### X-RAYS AND NUCLEAR PHYSICS

| | Page |
|---|---|
| The production of radio-isotopes, by A. H. W. Aten and J. Halberstadt | 1 |
| A universal apparatus for X-ray therapy with moving field irradiation, by H. Verse | 33 |
| Mirror cameras for general X-ray diagnostics, by W. Hondius Boldingh | 58 |
| The "Norelco" X-ray diffractometer, by W. Parrish, E. A. Hamacher and K. Lowitzsch | 123 |
| A pocket dosemeter, with built-in charger, for X-radiation and gamma radiation, by N. Warmoltz and P. P. M. Schampers | 134 |
| A radioactive-contamination monitor for the hands, feet and clothing, by A. Nemet, R. B. Stephens and W. A. Bayfield | 201 |
| A photo-multiplier tube for scintillation counting, by R. Champeix, H. Dormont and E. Morilleau | 250 |
| Fast counter circuits with decade scaler tubes, by E. J. van Barneveld | 360 |

### MEASURING EQUIPMENT

| | Page |
|---|---|
| Cheater circuits for the testing of thyratrons, by M. W. Brooker and D. G. Ware, I. Measurement of grid current | 43 |
| II. Life testing at high commutation factors | 98 |
| A new automatic hysteresis curve recorder, by F. G. Brockman and W. G. Steneck | 79 |
| An electronic D.C. millivoltmeter, by A. L. Biermasz and A. J. Michels | 117 |

The "Norelco" X-ray diffractometer, by W. Parrish, E. A. Hamacher and K. Lowitzsch 123

A pocket dosemeter, with built-in charger, for X-radiation and gamma radiation, by N. Warmoltz and P. P. M. Schampers . . . 134

A radio sonde for meteorological observations, by A. Hauer and M. van Tol . . . . . 148

A photo-multiplier tube for scintillation counting, by R. Champeix, H. Dormont and E. Morilleau . . . . . 250

Reflection and impedance measurements by means of a long transmission line, by J. C. van den Hoogenband and J. Stolk . . . 309

Fast counter circuits with decade scaler tubes, by E. J. van Barneveld . . . . . 360

## MATERIALS AND THEIR RESEARCH

The production of radio-isotopes, by A. H. W. Aten and J. Halberstadt . . . . . 1

Conditions for square hysteresis loops in ferrites, by H. P. J. Wijn, E. W. Gorter, C. J. Esveldt and P. Geldermans . . . . 49

A new automatic hysteresis curve recorder, by F. G. Brockman and W. G. Steneck . . . 79

The wear of diamond dies, by L. Schultink, H. L. Spier and A. J. van der Wagt . . . 91

Ferroxdure II and III, anisotropic permanent magnet materials, by A. L. Stuijts, G. W. Rathenau and G. H. Weber . . . . . 141

The theory and construction of germanium diodes, by J. C. van Vessem . . . . . 213

Sedimentation of fluorescent screens in cathode ray tubes, by F. de Boer and H. Emmens 232

Demonstration of the austenite-pearlite transformation by means of the emission electron microscope, by G. Baas . . . . . 337

Foreign atoms in metals, by J. D. Fast . . . 341

## MISCELLANEOUS

Cheater circuits for the testing of thyratrons, by M. W. Brooker and D. G. Ware,
I. Measurement of grid current . . . . . 43

II. Life testing at high commutation factors 98

Fundamentals of the gas refrigerating machine, by J. W. L. Köhler and C. O. Jonkers . . 69

The wear of diamond dies, by L. Schultink, H. L. Spier and A. J. van der Wagt . . . . 91

Construction of a gas refrigerating machine, by J. W. L. Köhler and C. O. Jonkers . . 105

A professional cine projector for 16 mm film, by J. J. Kotte . . . . . 158

Entropy in science and technology, by J. D. Fast,
I. The concept of entropy . . . . . 258

II. Examples and applications . . . . . 298

III. Examples and applications (continued) 321

Lightning and aircraft, by A. C. van Dorsten 296

"Boekesteyn" the agrobiological laboratory of N. V. Philips Roxane, by R. van der Veen 353
